

✓ TOP 1000 General Science One-Liner Questions (English)

Part – 1 (1–100)

1. Who discovered the cell? — Robert Hooke
2. What is the largest gland in the human body? — Liver
3. Why is blood red in color? — Due to hemoglobin
4. How many chambers are there in the human heart? — Four
5. What is the full form of DNA? — Deoxyribonucleic Acid
6. What is the process by which plants make food called? — Photosynthesis
7. What is the chemical name of Vitamin C? — Ascorbic Acid
8. What is the smallest bone in the human body? — Stapes
9. What is the chemical formula of water? — H_2O
10. Newton's First Law is related to what? — Inertia
11. What is the speed of light? — 3×10^8 m/s
12. In which medium does sound not travel? — Vacuum
13. What is the SI unit of electric current? — Ampere
14. Who discovered penicillin? — Alexander Fleming
15. Which instrument measures blood pressure? — Sphygmomanometer
16. What is the average blood volume in the human body? — 5–6 liters
17. Which gland secretes insulin? — Pancreas
18. What is the chemical symbol of Sodium? — Na
19. What is the chemical symbol of Iron? — Fe
20. What is the chemical formula of ozone? — O_3
21. The filament of an electric bulb is made of which metal? — Tungsten
22. What is the lightest gas? — Hydrogen
23. What is the taste of acids? — Sour
24. What is the taste of bases? — Bitter
25. What is the largest bone in the human body? — Femur
26. What is the hardest natural substance? — Diamond
27. What is the SI unit of temperature? — Kelvin
28. What is the SI unit of force? — Newton
29. What is the SI unit of energy? — Joule
30. What is the formula of work? — Force $\times$ Distance
31. What is the SI unit of electric potential? — Volt
32. What is the normal body temperature of humans? — $98.6^\circ F$
33. Deficiency of Vitamin D causes which disease? — Rickets
34. Deficiency of Vitamin B_1 causes which disease? — Beriberi
35. What causes malaria? — Plasmodium
36. What causes tuberculosis (TB)? — Mycobacterium tuberculosis
37. Which vitamin helps in blood clotting? — Vitamin K
38. How many teeth are there in adult humans? — 32
39. How many vertebrae are there in the human backbone? — 33

40. What is the acceleration due to gravity on Earth? — 9.8 m/s^2
41. Electric current in metals flows due to what? — Free electrons
42. Energy in the Sun is produced by which process? — Nuclear fusion
43. What is the main component of CNG? — Methane
44. What is the main component of LPG? — Butane
45. What is the pH value of human blood? — 7.4
46. Sound intensity is measured in what? — Decibel
47. What is the SI unit of power? — Watt
48. Who invented the transistor? — Shockley, Bardeen, Brattain
49. Gravity on the Moon is how much compared to Earth? — $1/6$
50. What is the main source of energy in the body? — Carbohydrates
51. Light year is a unit of what? — Distance
52. What is the control center of the cell? — Nucleus
53. What is the largest cell in the human body? — Ovum
54. Where is bile produced? — Liver
55. Sweat glands are which type of glands? — Exocrine glands
56. What is the boiling point of water? — 100°C
57. What is the freezing point of water? — 0°C
58. What is the main cause of acid rain? — Sulfur dioxide (SO_2)
59. Stainless steel is an alloy of which elements? — Iron, Chromium, Nickel
60. What is the chemical symbol of Copper? — Cu
61. What is the chemical symbol of Gold? — Au
62. What is the heaviest metal? — Osmium
63. Ohm's law is related to what? — Electric current
64. What is Newton's Third Law? — Action and reaction
65. In which medium does sound travel fastest? — Solid
66. The core of an electromagnet is made of what? — Iron
67. What is the largest organ of the human body? — Skin
68. Which mineral is essential for strong bones? — Calcium
69. Where does cellular respiration occur? — Mitochondria
70. What is the liquid part of blood called? — Plasma
71. What is the lifespan of RBC? — 120 days
72. What do WBCs fight against? — Infections
73. What is the outer covering of plant cells called? — Cell wall
74. Bacteria are what type of organisms? — Unicellular
75. AIDS is caused by which virus? — HIV
76. Who invented the telephone? — Alexander Graham Bell
77. Who gave the law of gravitation? — Isaac Newton
78. Who discovered radium? — Marie Curie
79. What is the smallest particle of an atom? — Electron
80. In which layer of atmosphere is the ozone layer found? — Stratosphere
81. Which vitamins are water-soluble? — B and C

82. What percentage of air is nitrogen? — 78%
83. What percentage of air is oxygen? — 21%
84. Why do metals have high melting points? — Strong bonding
85. Who discovered insulin? — Banting and Best
86. Reflection of light follows which rule? — Law of reflection
87. When does a solar eclipse occur? — New Moon
88. When does a lunar eclipse occur? — Full Moon
89. Who proposed the law of conservation of energy? — Joule
90. What is the chemical name of water? — Dihydrogen monoxide
91. How many lungs do humans have? — Two
92. What controls the heartbeat? — Pacemaker (SA node)
93. What is the largest part of the human brain? — Cerebrum
94. Who discovered blood groups? — Karl Landsteiner
95. Amoeba moves by what? — Pseudopodia
96. What is the formula of Hydrochloric Acid? — HCl
97. What is the chemical symbol of Calcium? — Ca
98. What is the color of ozone? — Pale blue
99. Electric current flows from which to which? — Higher potential to lower potential
100. What is the largest gland in the human body? — Liver

TOP 1000 General Science One-Liner Questions (English)

Part – 2 (101–200)

101. Who proposed the Cell Theory? — Schleiden and Schwann
102. What is the hereditary unit of life? — Gene
103. How many chromosomes are present in human beings? — 46
104. What carries oxygen in the blood? — Hemoglobin
105. What is the main organ of the respiratory system? — Lungs
106. Which tissue transports water in plants? — Xylem
107. Where does most digestion occur in humans? — Small intestine
108. What is the longest bone in the human body? — Femur
109. Proteins are made up of what? — Amino acids
110. Deficiency of Vitamin A causes what disease? — Night blindness
111. What is the SI unit of mass? — Kilogram
112. What is the SI unit of pressure? — Pascal
113. What is the formula of speed? — Distance / Time
114. What is the SI unit of acceleration? — m/s^2
115. What is the SI unit of work? — Joule
116. What is the SI unit of resistance? — Ohm
117. What is the SI unit of magnetic field? — Tesla
118. Who is known as the father of the Periodic Table? — Mendeleev
119. What is atomic number? — Number of protons

120. What is the charge of an electron? — -1.6×10^{-19} coulomb
121. Sound waves are what type of waves? — Longitudinal waves
122. Light waves are what type of waves? — Transverse waves
123. Which instrument measures atmospheric pressure? — Barometer
124. Which is the most reactive metal? — Cesium
125. Brass is an alloy of which metals? — Copper and Zinc
126. Bronze is an alloy of which metals? — Copper and Tin
127. The reaction between acid and base is called what? — Neutralization
128. What does pH value 7 indicate? — Neutral
129. Which hormone controls blood sugar level? — Insulin
130. Which gland secretes thyroxine? — Thyroid gland
131. Who discovered radioactivity? — Henri Becquerel
132. Who discovered nuclear fission? — Otto Hahn
133. What is the density of water? — 1 g/cm^3
134. What is the period of revolution of Earth? — 365 days
135. Which is the nearest planet to the Sun? — Mercury
136. Which is the largest planet in the solar system? — Jupiter
137. Which is the smallest planet in the solar system? — Mercury
138. What is the largest artery in the human body? — Aorta
139. Blood clotting depends mainly on which element? — Calcium
140. What is mitochondria called? — Powerhouse of the cell
141. What gives plants their green color? — Chlorophyll
142. Which gas is used in photosynthesis? — Carbon dioxide
143. Which gas is released during respiration? — Carbon dioxide
144. Which gas is mainly responsible for acid rain? — Sulfur dioxide
145. The ozone layer protects us from what? — Ultraviolet rays
146. How many bones are there in the human ear? — Three
147. In which medium does sound travel fastest? — Solid
148. Why is sodium kept in kerosene? — Highly reactive
149. Red litmus turns blue in what? — Base
150. Gas volume is related to which law? — Boyle's Law
151. Where are digestive enzymes produced? — Pancreas
152. Where are red blood cells formed? — Bone marrow
153. What is normal blood pressure? — 120/80 mmHg
154. What is the main organ of the nervous system? — Brain
155. What is the outer layer of skin called? — Epidermis
156. How many bones are there in the adult human body? — 206
157. In what form is food stored in plants? — Starch
158. What is the chemical formula of carbon dioxide? — CO_2
159. What is the chemical formula of ammonia? — NH_3
160. What is the chemical name of common salt? — Sodium chloride
161. Force is what type of quantity? — Vector quantity
162. Mass is what type of quantity? — Scalar quantity
163. Why is the Sun a source of energy? — Nuclear fusion

164. A battery provides which type of energy? — Chemical energy
165. An electric bulb converts electrical energy into what? — Light energy
166. Which is the lightest metal? — Lithium
167. Electric motor works on which principle? — Fleming's left-hand rule
168. Generator works on which principle? — Electromagnetic induction
169. What is the shape of DNA? — Double helix
170. What is the full form of RNA? — Ribonucleic Acid
171. Where is vacuole located in plant cells? — Center
172. What is the main function of kidneys? — Purification of blood
173. Which enzyme is present in saliva? — Amylase
174. What is the function of bile? — Digestion of fats
175. What type of bond is present in water? — Covalent bond
176. Diffusion of gases occurs due to what? — Molecular motion
177. What is the chemical symbol of Chlorine? — Cl
178. What is the chemical symbol of Nitrogen? — N
179. What is the atomic number of Hydrogen? — 1
180. What is the atomic number of Oxygen? — 8
181. What is the formula of electric current? — $I = V/R$
182. Refraction of light follows which law? — Snell's law
183. What is Earth's natural satellite? — Moon
184. Why is there no atmosphere on the Moon? — Low gravity
185. Radio waves are what type of waves? — Electromagnetic waves
186. Which is the hardest metal? — Chromium
187. Diamond is an allotrope of which element? — Carbon
188. Coal is mainly composed of which element? — Carbon
189. Petroleum is made up of what? — Hydrocarbons
190. Which element is essential in fertilizers? — Nitrogen
191. The human heart is what type of pump? — Muscular pump
192. Why do veins appear blue? — Light scattering effect
193. What is the approximate pH of human body fluids? — 7.4
194. Deficiency of iodine causes which disease? — Goiter
195. Gravitational force depends on what? — Mass
196. What is the formula of force? — $F = ma$
197. What causes depletion of ozone layer? — CFCs
198. Malaria is transmitted by which mosquito? — Anopheles
199. Plastic is what type of polymer? — Synthetic polymer
200. What is the most sensitive organ of the human body? — Skin

TOP 1000 General Science One-Liner Questions (English)

Part – 3 (201–300)

201. How many periods are there in the Periodic Table? — 7
202. How many groups are there in the Periodic Table? — 18

203. Which particles are present in the nucleus? — Protons and neutrons
204. Who discovered the electron? — J.J. Thomson
205. Who discovered the proton? — Rutherford
206. Who discovered the neutron? — James Chadwick
207. Where is most of the mass of an atom concentrated? — In the nucleus
208. What is an ion? — A charged atom
209. What are isotopes? — Same atomic number, different mass number
210. How many isotopes of hydrogen are there? — Three
211. Who proposed Boyle's Law? — Robert Boyle
212. What is the SI unit of heat? — Joule
213. Thermal conductivity is highest in which materials? — Metals
214. What happens to temperature during boiling? — It remains constant
215. What is sublimation? — Solid directly changing into gas
216. Evaporation occurs at what temperature? — Any temperature
217. What is the law of reflection? — Angle of incidence = Angle of reflection
218. What type of image does a concave mirror form? — Real or virtual
219. What type of image does a convex mirror form? — Always virtual
220. The power of a lens is measured in what? — Diopter
221. Where is the image formed in the human eye? — Retina
222. What is myopia? — Near-sightedness
223. What is hypermetropia? — Far-sightedness
224. Color blindness is related to which organ? — Eye
225. Loudness of sound depends on what? — Amplitude
226. Pitch of sound depends on what? — Frequency
227. What is the SI unit of electric charge? — Coulomb
228. Why does current flow in a conductor? — Free electrons
229. Transformer works on which principle? — Electromagnetic induction
230. How many poles does a magnet have? — Two
231. What is mitochondria called? — Powerhouse of the cell
232. Gas exchange in plants occurs through what? — Stomata
233. Transpiration in plants occurs through what? — Stomata
234. How many blood groups are there in humans? — Four
235. What is AB blood group called? — Universal recipient
236. What is O blood group called? — Universal donor
237. What is the smallest cell in the human body? — Sperm
238. What is the function of the skeletal system? — Support and protection
239. Deficiency of insulin causes which disease? — Diabetes
240. Which protein is found in bones? — Collagen
241. What is the pH value of acids? — Less than 7
242. What is the pH value of bases? — More than 7
243. Salt is formed by which reaction? — Acid + Base

244. What is oxidation? — Addition of oxygen
245. What is reduction? — Removal of oxygen
246. Rusting is an example of what? — Oxidation
247. What is the chemical formula of water? — H_2O
248. What is the atomic number of carbon? — 6
249. What is the chemical formula of sodium chloride? — NaCl
250. What is the chemical formula of sulfuric acid? — H_2SO_4
251. What is the shape of the Earth? — Oblate spheroid
252. What is the average distance between Earth and Sun? — 150 million km
253. How long does Earth take to rotate once? — 24 hours
254. What causes seasons? — Tilt of Earth's axis
255. Which is the largest moon in the solar system? — Ganymede
256. Comets are made up of what? — Ice and dust
257. Why is the sky blue? — Scattering of light
258. How many colors are there in a rainbow? — Seven
259. What is the outermost layer of Earth called? — Crust
260. Volcanoes are related to what? — Internal heat of Earth
261. How many types of muscles are there in the human body? — Three
262. Where are involuntary muscles found? — Internal organs
263. What is the function of RBC? — Oxygen transport
264. What is the function of WBC? — Defense against infection
265. What is the function of platelets? — Blood clotting
266. What percentage of the human body is water? — About 60%
267. How many kidneys do humans have? — Two
268. Where is urine formed? — Nephron
269. Gas exchange in lungs occurs in what? — Alveoli
270. What is the scientific name of humans? — *Homo sapiens*
271. What is the by-product of photosynthesis? — Oxygen
272. What is the color of chlorophyll? — Green
273. Pollination is related to what? — Reproduction in plants
274. Fertilization in plants occurs in what? — Ovary
275. Seed germination depends on what? — Water, air, temperature
276. Which metal is the best conductor of electricity? — Silver
277. What are the effects of electric current? — Heating and magnetic
278. Which device converts electrical energy into mechanical energy? — Motor
279. In which medium is speed of light highest? — Vacuum
280. What is Newton's Second Law? — $F = ma$
281. What is atomic number? — Number of protons
282. What is mass number? — Protons + Neutrons
283. What are isobars? — Same mass number
284. Diffusion of gases follows which law? — Graham's law
285. Nuclear energy is obtained from what? — Fission

- 286. What is the full form of AC? — Alternating Current
- 287. What is the full form of DC? — Direct Current
- 288. What does an electric meter measure? — Electrical energy
- 289. What does a barometer measure? — Atmospheric pressure
- 290. What does a hydrometer measure? — Density of liquids
- 291. What is a rich source of Vitamin C? — Amla (Indian gooseberry)
- 292. What is the source of Vitamin D? — Sunlight
- 293. Iron deficiency causes which disease? — Anemia
- 294. What is the role of calcium in bones? — Strength
- 295. Where does digestion begin? — Mouth
- 296. Saliva is secreted by which glands? — Salivary glands
- 297. What is the average weight of the human brain? — About 1.4 kg
- 298. What is the approximate total length of blood vessels in the human body? — About 100,000 km
- 299. What is the nearest star to Earth? — Sun
- 300. Solar energy is what type of energy? — Renewable energy

TOP 1000 General Science One-Liner Questions (English)

Part – 4 (301–400)

- 301. Which is the longest part of the digestive system? — Small intestine
- 302. What is the hardest substance in the human body? — Tooth enamel
- 303. The heart is made up of which type of muscle? — Cardiac muscle
- 304. Which blood component helps in clotting? — Platelets
- 305. What is the condition of low oxygen in the body called? — Hypoxia
- 306. What is the chemical name of Vitamin E? — Tocopherol
- 307. What is the main function of Vitamin K? — Blood clotting
- 308. Where is the smallest muscle in the body located? — Ear
- 309. Hormones are secreted by which system? — Endocrine system
- 310. Adrenaline is secreted by which gland? — Adrenal gland
- 311. Where do electrons revolve in an atom? — Energy levels (shells)
- 312. How many main types of chemical bonds are there? — Three
- 313. Ionic bonds are formed between what? — Metal and non-metal
- 314. Covalent bonds are formed between what? — Non-metals
- 315. Metals are generally what in appearance? — Lustrous (shiny)
- 316. Non-metals are generally what in nature? — Brittle
- 317. Hydrogen is classified as what type of element? — Non-metal
- 318. How many valence electrons does carbon have? — Four
- 319. What is the smell of ammonia like? — Pungent
- 320. Acids turn blue litmus into which color? — Red
- 321. The filament of a bulb is made of which metal? — Tungsten
- 322. What is the formula of electric power? — $P = VI$
- 323. Heat flows in which direction? — From higher temperature to lower

temperature

- 324. How many modes of heat transfer are there? — Three
- 325. Convection occurs in which states of matter? — Liquids and gases
- 326. Does radiation require a medium? — No
- 327. Reflection of light is maximum on which surface? — Smooth surface
- 328. What is the speed of sound in air? — About 343 m/s
- 329. Is the speed of light in water greater or less than in vacuum? — Less
- 330. Earth's gravity attracts what? — All objects
- 331. What is the outer covering of the cell called? — Cell membrane
- 332. What extra structure is present in plant cells? — Cell wall
- 333. Where does photosynthesis occur? — Chloroplast
- 334. Respiration uses which gas? — Oxygen
- 335. When do plants prepare food? — During daytime
- 336. Why is human blood red? — Due to hemoglobin
- 337. What is the liquid part of blood? — Plasma
- 338. WBCs protect the body from what? — Pathogens
- 339. Gastric juice is produced in which organ? — Stomach
- 340. What is the color of bile? — Green
- 341. Metals are located on which side of the Periodic Table? — Left side
- 342. Non-metals are located on which side? — Right side
- 343. Noble gases belong to which group? — Group 18
- 344. What is the atomic number of Sodium? — 11
- 345. What is the atomic number of Chlorine? — 17
- 346. What is the atomic number of Calcium? — 20
- 347. What is the atomic number of Iron? — 26
- 348. What is the atomic number of Gold? — 79
- 349. What is the chemical symbol of Silver? — Ag
- 350. What is the chemical symbol of Zinc? — Zn
- 351. What is the source of Sun's energy? — Nuclear fusion
- 352. Which is the hottest planet in the solar system? — Venus
- 353. How many layers does the Earth have? — Three
- 354. What is the lowest layer of the atmosphere? — Troposphere
- 355. In which layer is the ozone layer found? — Stratosphere
- 356. Clouds are formed in which layer? — Troposphere
- 357. Tides are caused mainly by what? — Moon's gravity
- 358. Earthquakes are caused by what? — Movement of tectonic plates
- 359. Who gave the laws of planetary motion? — Kepler
- 360. Why cannot sound travel in space? — Absence of medium
- 361. How many teeth does an adult human have? — 32
- 362. Which part of the brain regulates body temperature? — Hypothalamus
- 363. Which instrument measures blood pressure? — Sphygmomanometer
- 364. What is the normal heartbeat rate? — About 72 beats per minute
- 365. What is the lifespan of RBC? — 120 days

- 366. What is the lifespan of WBC? — A few days
- 367. Sweating helps in what? — Cooling the body
- 368. What percentage of the human body is water? — About 60%
- 369. Who discovered insulin? — Banting and Best
- 370. Diabetes is related to which organ? — Pancreas
- 371. Gas pressure depends mainly on what? — Temperature
- 372. Metals expand due to what? — Heat
- 373. Steel is an alloy of what? — Iron and carbon
- 374. Glass is mainly made from what? — Silica
- 375. Soap is a salt of what? — Fatty acids
- 376. What is the taste of acids? — Sour
- 377. What is the taste of bases? — Bitter
- 378. What is the taste of salts? — Salty
- 379. Who introduced the pH scale? — Sorensen
- 380. Give an example of a radioactive element. — Uranium
- 381. Who discovered electromagnetic induction? — Michael Faraday
- 382. Newton's First Law is also known as what? — Law of inertia
- 383. Newton's Second Law states what? — $F = ma$
- 384. Newton's Third Law states what? — Every action has equal and opposite reaction
- 385. Refraction of light occurs due to what? — Change of medium
- 386. A concave lens forms what type of image? — Virtual
- 387. A convex lens can form what type of image? — Real or virtual
- 388. Scattering of light is due to what? — Particles
- 389. When does the sky appear red? — At sunrise and sunset
- 390. What causes dispersion of light? — Refraction
- 391. Deficiency of Vitamin B₁₂ causes what? — Anemia
- 392. Deficiency of thyroid hormone causes what? — Goiter
- 393. What is the pH of blood? — 7.4
- 394. What is the normal breathing rate? — 16–18 per minute
- 395. What is the last part of the digestive system? — Rectum
- 396. What is the main function of liver? — Production of bile
- 397. What is the main function of kidney? — Blood purification
- 398. What is the main function of skin? — Protection
- 399. What is the largest part of the brain? — Cerebrum
- 400. What is the largest gland in the human body? — Liver

TOP 1000 General Science One-Liner Questions (English)

Part – 5 (401–500)

- 401. What is the longest cell in the human body? — Nerve cell (Neuron)
- 402. The brain and spinal cord together form what? — Central nervous system

403. What is the main purpose of respiration? — To produce energy
404. What is the full form of ATP? — Adenosine Triphosphate
405. What is the function of hemoglobin? — Transport oxygen
406. Where are red blood cells produced? — Bone marrow
407. Which enzyme is present in saliva? — Ptyalin (Amylase)
408. Deficiency of Vitamin C causes what? — Scurvy
409. Deficiency of Vitamin D causes what? — Rickets
410. Deficiency of Vitamin A causes what? — Night blindness
411. What is the charge on an electron? — Negative
412. What is the charge on a proton? — Positive
413. What is the charge on a neutron? — Neutral
414. What is the center of an atom called? — Nucleus
415. Which is the best conductor of electricity? — Silver
416. Which is the most malleable metal? — Gold
417. Which metal is liquid at room temperature? — Mercury
418. Diffusion of gases occurs due to what? — Kinetic energy
419. What is the main cause of acid rain? — Sulfur dioxide
420. What is the hardest form of carbon? — Diamond
421. A quantity having magnitude and direction is called what? — Vector
422. A quantity having only magnitude is called what? — Scalar
423. What is the formula of pressure? — Force / Area
424. What is the formula of power? — Work / Time
425. What does the law of conservation of energy state? — Energy can neither be created nor destroyed
426. How many types of heat transfer are there? — Three
427. Conduction is maximum in which state? — Solid
428. What is the speed of sound in air? — About 343 m/s
429. What is the speed of light in vacuum? — 3×10^8 m/s
430. Gravitational force acts between what? — Two masses
431. Which tissue transports food in plants? — Phloem
432. What is the genetic material of the cell? — DNA
433. What is the scientific name of humans? — Homo sapiens
434. Where does digestion begin? — Mouth
435. Where does absorption of digested food occur? — Small intestine
436. Gas exchange in lungs occurs in what? — Alveoli
437. What is the functional unit of kidney? — Nephron
438. How many circulatory loops are there in humans? — Two
439. What is the largest gland in the human body? — Liver
440. What is the largest artery in the human body? — Aorta
441. What is the chemical symbol of Potassium? — K
442. What is the chemical symbol of Iron? — Fe
443. What is the chemical symbol of Copper? — Cu
444. What is the chemical symbol of Nitrogen? — N
445. What is the chemical symbol of Oxygen? — O

- 446. What is the chemical symbol of Hydrogen? — H
- 447. What is the chemical symbol of Chlorine? — Cl
- 448. What is the formula of carbon dioxide? — CO₂
- 449. What is the formula of methane? — CH₄
- 450. What is the formula of ammonia? — NH₃
- 451. When does a solar eclipse occur? — On New Moon
- 452. When does a lunar eclipse occur? — On Full Moon
- 453. What is Earth's natural satellite? — Moon
- 454. How long does Earth take to revolve around the Sun? — 365 days
- 455. How long does Earth take to rotate on its axis? — 24 hours
- 456. What causes seasonal changes? — Tilt of Earth's axis
- 457. Which is the largest planet? — Jupiter
- 458. Which is the smallest planet? — Mercury
- 459. Which is the hottest planet? — Venus
- 460. Why is gravity weaker in space? — Greater distance from mass
- 461. Why is blood red? — Due to hemoglobin
- 462. What is the lifespan of RBC? — 120 days
- 463. What is the function of WBC? — Defense against infection
- 464. What is the function of platelets? — Blood clotting
- 465. What is normal blood pressure? — 120/80 mmHg
- 466. What is normal body temperature? — 98.6°F
- 467. Insulin deficiency causes what? — Diabetes
- 468. Iodine deficiency causes what? — Goiter
- 469. Iron deficiency causes what? — Anemia
- 470. Calcium deficiency leads to what? — Weak bones
- 471. What is the SI unit of electric current? — Ampere
- 472. What is the SI unit of resistance? — Ohm
- 473. What is the SI unit of power? — Watt
- 474. What is the SI unit of energy? — Joule
- 475. What is the SI unit of frequency? — Hertz
- 476. What is wavelength related to? — Waves
- 477. Sound is what type of wave? — Longitudinal
- 478. Light is what type of wave? — Transverse
- 479. Transformer works on which principle? — Electromagnetic induction
- 480. Barometer measures what? — Atmospheric pressure
- 481. What is the taste of acids? — Sour
- 482. What is the taste of bases? — Bitter
- 483. What is the taste of salts? — Salty
- 484. What does pH value 7 indicate? — Neutral
- 485. What is oxidation? — Addition of oxygen
- 486. What is reduction? — Removal of oxygen
- 487. Rusting is an example of what? — Oxidation
- 488. Plastic is what type of material? — Polymer
- 489. Steel is an alloy of what? — Iron and carbon

- 490. Brass is an alloy of what? — Copper and zinc
- 491. What gas is released in photosynthesis? — Oxygen
- 492. In what form do plants store food? — Starch
- 493. What is required for seed germination? — Water, air, temperature
- 494. Pollination is related to what? — Reproduction
- 495. How many bones are there in the human body? — 206
- 496. What is the largest part of the brain? — Cerebrum
- 497. Which part of the brain maintains balance? — Cerebellum
- 498. What is normal breathing rate? — 16–18 per minute
- 499. What is the lifespan of RBC? — 120 days
- 500. What is the largest gland in the human body? — Liver

TOP 1000 General Science One-Liner Questions (English)

Part – 6 (501–600)

- 501. What is the longest nerve in the human body? — Sciatic nerve
- 502. What is the basic unit of the nervous system? — Neuron
- 503. What percentage of blood is plasma? — About 55%
- 504. What controls the heartbeat? — SA node (Pacemaker)
- 505. Where is oxygen stored in muscles? — Myoglobin
- 506. What is the average lung capacity? — About 6 liters
- 507. Approximately how many muscles are there in the human body? — About 639
- 508. What is the approximate pH of saliva? — 6.8
- 509. Who proposed the structure of DNA? — Watson and Crick
- 510. Who is known as the father of Genetics? — Gregor Mendel
- 511. What are atomic shells also called? — Energy levels
- 512. Substances formed in a chemical reaction are called what? — Products
- 513. What is the function of a catalyst? — Increase reaction rate
- 514. Who introduced the pH scale? — Sorensen
- 515. How does sodium react with water? — Violently
- 516. How many main allotropes of carbon are there? — Three
- 517. Diamond and graphite are forms of what? — Carbon
- 518. Who discovered oxygen? — Joseph Priestley
- 519. Who discovered hydrogen? — Henry Cavendish
- 520. Who gave the modern periodic law? — Moseley
- 521. What is the formula of force? — $F = ma$
- 522. Who proposed the law of gravitation? — Isaac Newton
- 523. Friction acts against what? — Motion
- 524. How can friction be reduced? — Lubrication
- 525. Focal length is measured in what? — Meter
- 526. Convex mirrors are used where? — Rear-view mirrors

527. Frequency is measured in what? — Hertz
528. Light year is a unit of what? — Distance
529. What does a voltmeter measure? — Potential difference
530. What does an ammeter measure? — Electric current
531. Which gas is used in photosynthesis? — Carbon dioxide
532. When does respiration occur in plants? — Day and night
533. What is the average blood volume in humans? — 5–6 liters
534. What is the function of bone marrow? — Formation of blood cells
535. What is the function of RBC? — Carry oxygen
536. What is the function of WBC? — Immunity
537. What is the approximate platelet count in blood? — 1.5–4 lakh per mm^3
538. Insulin regulates what? — Blood sugar
539. What is adrenaline also called? — Emergency hormone
540. Thyroxine is secreted by which gland? — Thyroid gland
541. What is the common name of sodium chloride? — Salt
542. What is HCl commonly known as? — Hydrochloric acid
543. What is H_2SO_4 commonly known as? — Sulfuric acid
544. What is NaOH commonly known as? — Caustic soda
545. What is KOH commonly known as? — Caustic potash
546. What is the formula of ammonia? — NH_3
547. What is the formula of methane? — CH_4
548. What is CO commonly known as? — Carbon monoxide
549. What is CO_2 commonly known as? — Carbon dioxide
550. What is O_3 ? — Ozone
551. What is the surface temperature of the Sun? — About 6000°C
552. What is the diameter of Earth? — About 12,742 km
553. Moon's gravity is how much of Earth's? — $1/6$
554. Which is the brightest planet? — Venus
555. Solar energy is what type of energy? — Renewable energy
556. Which gas is most abundant in the atmosphere? — Nitrogen
557. What is the function of the ozone layer? — Protect from UV rays
558. What is the outermost layer of Earth? — Crust
559. What comes out of a volcano? — Lava
560. Earthquake intensity is measured on which scale? — Richter scale
561. How many vertebrae are there in humans? — 33
562. What is the pH of blood? — 7.4
563. Which part of the brain controls balance? — Cerebellum
564. What does the pupil control? — Amount of light entering eye
565. What is the main function of skin? — Protection
566. What is the main function of liver? — Production of bile
567. What is the main function of kidney? — Purification of blood
568. Sweat is secreted by which glands? — Sweat glands
569. What is normal breathing rate? — 16–18 per minute

- 570. What is the strongest bone in the human body? — Femur
- 571. What is the SI unit of energy? — Joule
- 572. What is the SI unit of power? — Watt
- 573. What is the SI unit of pressure? — Pascal
- 574. What is the SI unit of frequency? — Hertz
- 575. Wavelength is a property of what? — Wave
- 576. In which medium does sound not travel? — Vacuum
- 577. Refraction occurs due to what? — Change in medium
- 578. State the law of reflection. — Angle of incidence = Angle of reflection
- 579. Electric current flows from what to what? — Higher potential to lower potential
- 580. Generator works on which principle? — Electromagnetic induction
- 581. What is oxidation? — Addition of oxygen
- 582. What is reduction? — Removal of oxygen
- 583. What is the pH of acids? — Less than 7
- 584. What is the pH of bases? — More than 7
- 585. Salt is formed by what reaction? — Acid + Base
- 586. Steel is an alloy of what? — Iron and carbon
- 587. Brass is an alloy of what? — Copper and zinc
- 588. Bronze is an alloy of what? — Copper and tin
- 589. Rusting is an example of what? — Oxidation
- 590. Plastic is what type of material? — Synthetic polymer
- 591. Which gas is released during photosynthesis? — Oxygen
- 592. In what form is food stored in plants? — Starch
- 593. What is required for seed germination? — Water, air, temperature
- 594. Pollination is related to what? — Reproduction
- 595. How many bones are there in the human body? — 206
- 596. What is the largest part of the brain? — Cerebrum
- 597. What is normal blood pressure? — 120/80 mmHg
- 598. Insulin deficiency causes what? — Diabetes
- 599. Iron deficiency causes what? — Anemia
- 600. What is the largest gland in the human body? — Liver

TOP 1000 General Science One-Liner Questions (English)

Part – 7 (601–700)

- 601. What is the process of blood clotting called? — Coagulation
- 602. What is the condition of oxygen deficiency in the body called? — Hypoxia
- 603. What is the membrane covering the lungs called? — Pleura
- 604. What is the outer covering of the heart called? — Pericardium
- 605. Which part of the brain controls breathing? — Medulla oblongata
- 606. What is the smallest gland in the human body? — Pituitary gland

607. The pituitary gland is known as what? — Master gland
608. What is the normal blood sugar level? — About 70–110 mg/dL
609. How many pairs of ribs are there in humans? — 12 pairs
610. Vitamin D is synthesized in the body with the help of what? — Sunlight
611. Where is positive charge located in an atom? — In the nucleus
612. Reaction rate increases with what? — Temperature
613. What two factors are necessary for rusting? — Oxygen and moisture
614. What is the atomic number of carbon? — 6
615. What is the atomic number of nitrogen? — 7
616. What is the atomic number of oxygen? — 8
617. What is the atomic number of chlorine? — 17
618. What is the chemical symbol of iodine? — I
619. Helium belongs to which type of gases? — Noble gases
620. Ozone is an allotrope of what? — Oxygen
621. Define work. — Force $\times$ Distance
622. What is the formula of kinetic energy? — $\frac{1}{2}mv^2$
623. Potential energy depends on what? — Height
624. What is the formula of power? — Work / Time
625. What is the value of acceleration due to gravity? — 9.8 m/s^2
626. What is the advantage of friction? — Helps in walking
627. What law does reflection follow? — Law of reflection
628. Where is a concave mirror used? — Shaving mirror
629. Where is a convex mirror used? — Side mirror of vehicles
630. Is speed of sound in water greater or less than in air? — Greater
631. Gas exchange in plants occurs through what? — Stomata
632. What is the function of chlorophyll? — Absorb light
633. Where does cellular respiration occur? — Mitochondria
634. What is the liquid part of blood called? — Plasma
635. What is the lifespan of RBC? — 120 days
636. What is the main function of WBC? — Immunity
637. What is the function of platelets? — Blood clotting
638. What is normal body temperature? — 98.6°F
639. What percentage of the human body is water? — About 60%
640. What strengthens bones? — Calcium
641. What is the formula of sodium chloride? — NaCl
642. What is the formula of calcium carbonate? — CaCO_3
643. What is the formula of glucose? — $\text{C}_6\text{H}_{12}\text{O}_6$
644. What is the formula of ammonium chloride? — NH_4Cl
645. What is the formula of nitric acid? — HNO_3
646. What is the formula of phosphoric acid? — H_3PO_4
647. What is the formula of copper sulfate? — CuSO_4
648. What is the formula of zinc oxide? — ZnO
649. What is the chemical symbol of magnesium? — Mg

650. What is the chemical symbol of aluminum? — Al
651. What is the main component of the Sun? — Hydrogen
652. What is Earth's natural satellite? — Moon
653. What is the approximate age of Earth? — 4.5 billion years
654. Which is the largest planet? — Jupiter
655. Which is the smallest planet? — Mercury
656. Which is the brightest planet? — Venus
657. What is the shape of Earth? — Oblate spheroid
658. What is the outermost layer of Earth called? — Crust
659. What is the uppermost layer of the atmosphere? — Exosphere
660. How many colors are there in a rainbow? — Seven
661. How many teeth are there in adults? — 32
662. Which instrument measures blood pressure? — Sphygmomanometer
663. What is the normal breathing rate? — 16–18 per minute
664. What is the normal heart rate? — 72 beats per minute
665. Insulin deficiency causes what? — Diabetes
666. Iodine deficiency causes what? — Goiter
667. Iron deficiency causes what? — Anemia
668. Vitamin C deficiency causes what? — Scurvy
669. Vitamin A deficiency causes what? — Night blindness
670. Vitamin B₁ deficiency causes what? — Beriberi
671. What is the SI unit of electric current? — Ampere
672. What is the SI unit of resistance? — Ohm
673. What is the SI unit of power? — Watt
674. What is the SI unit of energy? — Joule
675. What is the SI unit of frequency? — Hertz
676. Sound waves are what type of waves? — Longitudinal
677. Light waves are what type of waves? — Transverse
678. In which direction does current flow? — Higher potential to lower potential
679. Generator works on which principle? — Electromagnetic induction
680. Transformer works on which principle? — Electromagnetic induction
681. What is the taste of acids? — Sour
682. What is the taste of bases? — Bitter
683. What is the taste of salts? — Salty
684. What is the range of pH scale? — 0 to 14
685. What is the pH of a neutral substance? — 7
686. Rusting is an example of what? — Oxidation
687. Define oxidation. — Addition of oxygen
688. Define reduction. — Removal of oxygen
689. Steel is an alloy of what? — Iron and carbon
690. Brass is an alloy of what? — Copper and zinc
691. Which gas is released during photosynthesis? — Oxygen
692. In what form is food stored in plants? — Starch

- 693. What is required for seed germination? — Water, air, temperature
- 694. Pollination is related to what? — Reproduction
- 695. How many bones are there in the human body? — 206
- 696. What is the largest part of the brain? — Cerebrum
- 697. Which part of the brain maintains balance? — Cerebellum
- 698. What is normal blood pressure? — 120/80 mmHg
- 699. What is the lifespan of RBC? — 120 days
- 700. What is the largest gland in the human body? — Liver

TOP 1000 General Science One-Liner Questions (English)

Part – 8 (701–800)

- 701. Who discovered blood circulation? — William Harvey
- 702. How many chambers are there in the human heart? — Four
- 703. Arteries generally carry which type of blood? — Oxygenated blood (except pulmonary artery)
- 704. Veins generally carry which type of blood? — Deoxygenated blood (except pulmonary vein)
- 705. What is the main function of lymph? — Immunity and fluid balance
- 706. How many bones are there in the adult human body? — 206
- 707. What is the main function of the skeletal system? — Support and protection
- 708. Which cells in the eye detect color? — Cone cells
- 709. Which cells in the retina are sensitive to light? — Rods and cones
- 710. Which part of the ear helps in balance? — Semicircular canals
- 711. Give an example of a chemical change. — Curd formation
- 712. Give an example of a physical change. — Melting of ice
- 713. Where is atomic mass concentrated? — In the nucleus
- 714. What is the unit of radioactivity? — Curie
- 715. Give an example of a radioactive element. — Uranium
- 716. What is the molecular formula of oxygen? — O_2
- 717. What is the molecular formula of nitrogen? — N_2
- 718. What is the molecular formula of hydrogen? — H_2
- 719. Acid rain is mainly caused by which gas? — Sulfur dioxide
- 720. Rusting is what type of reaction? — Oxidation
- 721. What is the formula of velocity? — Displacement / Time
- 722. What is the formula of acceleration? — Change in velocity / Time
- 723. Newton's First Law is also called what? — Law of inertia
- 724. Newton's Second Law states what? — $F = ma$
- 725. Newton's Third Law states what? — Action and reaction are equal and opposite
- 726. Friction is caused due to what? — Surface irregularities
- 727. What is the SI unit of work? — Joule

728. What is the SI unit of power? — Watt
729. What is the SI unit of energy? — Joule
730. What is the SI unit of pressure? — Pascal
731. Transpiration in plants occurs through what? — Stomata
732. Which light is used in photosynthesis? — Visible light
733. In what form do plants store food? — Starch
734. What are essential factors for seed germination? — Water, air, temperature
735. What is the control center of the cell? — Nucleus
736. What is the structure of DNA? — Double helix
737. Where are chromosomes located? — In the nucleus
738. Why is blood red? — Due to hemoglobin
739. What is the lifespan of RBC? — 120 days
740. What is the function of platelets? — Blood clotting
741. What is the common name of NaOH? — Caustic soda
742. What is the common name of KOH? — Caustic potash
743. What is the common name of CaO? — Quicklime
744. What is the common name of CO₂? — Carbon dioxide
745. What is the common name of NH₃? — Ammonia
746. What is the common name of H₂O? — Water
747. What is the common name of O₃? — Ozone
748. What is the common name of NaCl? — Salt
749. What is the common name of CH₄? — Methane
750. What is the common name of H₂SO₄? — Sulfuric acid
751. What is the main element of the Sun? — Hydrogen
752. How long does Earth take to revolve around the Sun? — 365 days
753. Moon's gravity is how much of Earth's gravity? — 1/6
754. Which is the largest planet in the solar system? — Jupiter
755. Which is the smallest planet in the solar system? — Mercury
756. Which is the hottest planet? — Venus
757. What is the lowest layer of the atmosphere? — Troposphere
758. In which layer is the ozone layer found? — Stratosphere
759. Earthquake intensity is measured on which scale? — Richter scale
760. What is molten rock inside the Earth called? — Magma
761. What is the normal human body temperature? — 98.6°F
762. What is the normal blood pressure? — 120/80 mmHg
763. What is the normal breathing rate? — 16–18 per minute
764. What is the normal heart rate? — 72 beats per minute
765. Iodine deficiency causes what? — Goiter
766. Iron deficiency causes what? — Anemia
767. Vitamin C deficiency causes what? — Scurvy
768. Vitamin D deficiency causes what? — Rickets
769. Insulin deficiency causes what? — Diabetes
770. Calcium deficiency causes what? — Weak bones

- 771. What is the SI unit of electric current? — Ampere
- 772. What is the SI unit of resistance? — Ohm
- 773. What is the SI unit of power? — Watt
- 774. What is the SI unit of energy? — Joule
- 775. What is the SI unit of frequency? — Hertz
- 776. What is the speed of light in vacuum? — 3×10^8 m/s
- 777. Sound cannot travel in which medium? — Vacuum
- 778. State the law of reflection. — Angle of incidence = Angle of reflection
- 779. Refraction occurs due to what? — Change in medium
- 780. Generator works on which principle? — Electromagnetic induction
- 781. What is the pH of acids? — Less than 7
- 782. What is the pH of bases? — Greater than 7
- 783. What is the pH of a neutral solution? — 7
- 784. Rusting is an example of what? — Oxidation
- 785. What is oxidation? — Addition of oxygen
- 786. What is reduction? — Removal of oxygen
- 787. Steel is an alloy of what? — Iron and carbon
- 788. Brass is an alloy of what? — Copper and zinc
- 789. Bronze is an alloy of what? — Copper and tin
- 790. Plastic is what type of material? — Synthetic polymer
- 791. Which gas is released during photosynthesis? — Oxygen
- 792. In what form is food stored in plants? — Starch
- 793. What is required for seed germination? — Water, air, temperature
- 794. Pollination is related to what? — Reproduction
- 795. How many bones are there in the human body? — 206
- 796. What is the largest part of the brain? — Cerebrum
- 797. Which part of the brain maintains balance? — Cerebellum
- 798. What is the lifespan of RBC? — 120 days
- 799. What is the normal blood pressure? — 120/80 mmHg
- 800. What is the largest gland in the human body? — Liver

TOP 1000 General Science One-Liner Questions (English)

Part – 9 (801–900)

- 801. How many types of blood circulation are there in humans? — Two (Pulmonary and Systemic)
- 802. The left side of the heart pumps which type of blood? — Oxygenated blood
- 803. The right side of the heart pumps which type of blood? — Deoxygenated blood
- 804. Who discovered blood groups? — Karl Landsteiner
- 805. What is AB blood group called? — Universal recipient
- 806. What is O blood group called? — Universal donor

807. What is the largest artery in the human body? — Aorta
808. What is the main function of lymphatic system? — Immunity
809. What is the normal hemoglobin level in adults? — About 12–16 g/dL
810. What is the normal platelet count? — 1.5–4 lakh per mm³
811. What is atomic number? — Number of protons
812. What is mass number? — Protons + Neutrons
813. What are isotopes? — Same atomic number, different mass number
814. How many elements are there in the Periodic Table? — 118
815. Metals are generally found in which state? — Solid
816. Non-metals are generally found in which state? — Gas or solid
817. What is the atomic number of helium? — 2
818. What is the chemical symbol of gold? — Au
819. What is the chemical symbol of silver? — Ag
820. What is the chemical symbol of zinc? — Zn
821. Define work. — Force × Distance
822. Define power. — Work / Time
823. Who proposed the law of conservation of energy? — Joule
824. Who gave the law of gravitation? — Newton
825. Friction acts against what? — Motion
826. What is the speed of light in vacuum? — 3×10^8 m/s
827. What is the speed of sound in air? — About 343 m/s
828. State the law of reflection. — Angle of incidence = Angle of reflection
829. What type of image can a convex lens form? — Real or virtual
830. What type of image does a concave lens form? — Virtual
831. Which gas is used in photosynthesis? — Carbon dioxide
832. What is the by-product of photosynthesis? — Oxygen
833. What is mitochondria called? — Powerhouse of the cell
834. What is the control center of the cell? — Nucleus
835. Who explained the structure of DNA? — Watson and Crick
836. Where are chromosomes located? — In the nucleus
837. How many bones are there in the human body? — 206
838. What is the lifespan of RBC? — 120 days
839. What is the main function of WBC? — Immunity
840. What is the function of platelets? — Blood clotting
841. What is the common name of HCl? — Hydrochloric acid
842. What is the common name of H₂SO₄? — Sulfuric acid
843. What is the common name of HNO₃? — Nitric acid
844. What is the common name of NaOH? — Caustic soda
845. What is the common name of KOH? — Caustic potash
846. What is the common name of CaCO₃? — Limestone
847. What is the common name of NH₃? — Ammonia
848. What is the common name of CO? — Carbon monoxide
849. What is the common name of CO₂? — Carbon dioxide
850. What is the common name of CH₄? — Methane

851. What is Earth's natural satellite? — Moon
852. What is the main element in the Sun? — Hydrogen
853. How long does Earth take to revolve around the Sun? — 365 days
854. Moon's gravity is how much of Earth's? — $\frac{1}{6}$
855. Which is the largest planet? — Jupiter
856. Which is the smallest planet? — Mercury
857. Which is the hottest planet? — Venus
858. What is the lowest layer of atmosphere? — Troposphere
859. In which layer is ozone layer found? — Stratosphere
860. Earthquake intensity is measured on which scale? — Richter scale
861. What is normal blood pressure? — 120/80 mmHg
862. What is normal body temperature? — 98.6°F
863. What is normal breathing rate? — 16–18 per minute
864. What is normal heart rate? — 72 beats per minute
865. Insulin deficiency causes what? — Diabetes
866. Iodine deficiency causes what? — Goiter
867. Iron deficiency causes what? — Anemia
868. Vitamin C deficiency causes what? — Scurvy
869. Vitamin D deficiency causes what? — Rickets
870. Vitamin B₁ deficiency causes what? — Beriberi
871. What is the SI unit of electric current? — Ampere
872. What is the SI unit of resistance? — Ohm
873. What is the SI unit of power? — Watt
874. What is the SI unit of energy? — Joule
875. What is the SI unit of frequency? — Hertz
876. Sound cannot travel in which medium? — Vacuum
877. Refraction occurs due to what? — Change in medium
878. Generator works on which principle? — Electromagnetic induction
879. Transformer works on which principle? — Electromagnetic induction
880. What is the SI unit of pressure? — Pascal
881. What is the pH of acids? — Less than 7
882. What is the pH of bases? — Greater than 7
883. What is the pH of neutral solution? — 7
884. Rusting is an example of what? — Oxidation
885. What is oxidation? — Addition of oxygen
886. What is reduction? — Removal of oxygen
887. Steel is an alloy of what? — Iron and carbon
888. Brass is an alloy of what? — Copper and zinc
889. Bronze is an alloy of what? — Copper and tin
890. Plastic is what type of material? — Synthetic polymer
891. Which gas is released during photosynthesis? — Oxygen
892. In what form is food stored in plants? — Starch
893. What is required for seed germination? — Water, air, temperature
894. Pollination is related to what? — Reproduction

- 895. How many bones are there in the human body? — 206
- 896. What is the largest part of the brain? — Cerebrum
- 897. Which part of the brain maintains balance? — Cerebellum
- 898. What is the lifespan of RBC? — 120 days
- 899. What is normal blood pressure? — 120/80 mmHg
- 900. What is the largest gland in the human body? — Liver

TOP 1000 General Science One-Liner Questions (English)

Part – 10 (901–1000)

- 901. What is the largest gland in the human body? — Liver
- 902. What is the smallest bone in the human body? — Stapes
- 903. What transports oxygen in the blood? — Hemoglobin
- 904. Which blood component helps in clotting? — Platelets
- 905. What is normal blood pressure? — 120/80 mmHg
- 906. What is normal body temperature? — 98.6°F
- 907. Insulin is secreted by which gland? — Pancreas
- 908. Iodine deficiency causes what? — Goiter
- 909. Iron deficiency causes what? — Anemia
- 910. Vitamin C deficiency causes what? — Scurvy
- 911. What is the center of an atom called? — Nucleus
- 912. What is the charge on an electron? — Negative
- 913. What is the charge on a proton? — Positive
- 914. What is the charge on a neutron? — Neutral
- 915. What is atomic number? — Number of protons
- 916. What is mass number? — Protons + Neutrons
- 917. How many elements are there in the Periodic Table? — 118
- 918. What is the chemical symbol of gold? — Au
- 919. What is the chemical symbol of silver? — Ag
- 920. What is the chemical symbol of iron? — Fe
- 921. What is the formula of work? — Force × Distance
- 922. What is the formula of power? — Work / Time
- 923. What is the SI unit of energy? — Joule
- 924. What is the SI unit of power? — Watt
- 925. What is the SI unit of pressure? — Pascal
- 926. What is the speed of light in vacuum? — 3×10^8 m/s
- 927. In which medium does sound not travel? — Vacuum
- 928. Newton's First Law is known as what? — Law of inertia
- 929. Newton's Second Law states what? — $F = ma$
- 930. Newton's Third Law states what? — Action and reaction are equal and opposite
- 931. Which gas is used in photosynthesis? — Carbon dioxide
- 932. What is released during photosynthesis? — Oxygen

933. What is mitochondria known as? — Powerhouse of the cell
934. What is the control center of the cell? — Nucleus
935. What is the full form of DNA? — Deoxyribonucleic Acid
936. How many bones are there in the human body? — 206
937. What is the lifespan of RBC? — 120 days
938. What is the main function of WBC? — Immunity
939. What is the function of platelets? — Blood clotting
940. What is the largest part of the brain? — Cerebrum
941. What is the common name of HCl? — Hydrochloric acid
942. What is the common name of H_2SO_4 ? — Sulfuric acid
943. What is the common name of NaOH? — Caustic soda
944. What is the common name of KOH? — Caustic potash
945. What is the common name of NaCl? — Salt
946. What is the common name of CO_2 ? — Carbon dioxide
947. What is the common name of CH_4 ? — Methane
948. What is the common name of NH_3 ? — Ammonia
949. What is the common name of O_3 ? — Ozone
950. What is the common name of CaCO_3 ? — Limestone
951. What is the main element of the Sun? — Hydrogen
952. What is Earth's natural satellite? — Moon
953. How long does Earth take to revolve around the Sun? — 365 days
954. Moon's gravity is how much of Earth's? — $\frac{1}{6}$
955. Which is the largest planet? — Jupiter
956. Which is the smallest planet? — Mercury
957. Which is the hottest planet? — Venus
958. What is the lowest layer of the atmosphere? — Troposphere
959. In which layer is the ozone layer found? — Stratosphere
960. Earthquake intensity is measured on which scale? — Richter scale
961. What is the SI unit of electric current? — Ampere
962. What is the SI unit of resistance? — Ohm
963. What is the SI unit of energy? — Joule
964. What is the SI unit of power? — Watt
965. What is the SI unit of frequency? — Hertz
966. What is the speed of sound in air? — About 343 m/s
967. Refraction occurs due to what? — Change in medium
968. Generator works on which principle? — Electromagnetic induction
969. Transformer works on which principle? — Electromagnetic induction
970. State the law of reflection. — Angle of incidence = Angle of reflection
971. What is the pH of acids? — Less than 7
972. What is the pH of bases? — Greater than 7
973. What is the pH of a neutral solution? — 7
974. Rusting is an example of what? — Oxidation
975. What is oxidation? — Addition of oxygen

976. What is reduction? — Removal of oxygen
977. Steel is an alloy of what? — Iron and carbon
978. Brass is an alloy of what? — Copper and zinc
979. Bronze is an alloy of what? — Copper and tin
980. Plastic is what type of material? — Synthetic polymer
981. Which gas is released during photosynthesis? — Oxygen
982. In what form is food stored in plants? — Starch
983. What is required for seed germination? — Water, air, temperature
984. Pollination is related to what? — Reproduction
985. How many bones are there in the human body? — 206
986. What is the largest part of the brain? — Cerebrum
987. Which part of the brain maintains balance? — Cerebellum
988. What is the lifespan of RBC? — 120 days
989. What is normal blood pressure? — 120/80 mmHg
990. What is the largest gland in the human body? — Liver
991. Vitamin A deficiency causes what? — Night blindness
992. Vitamin B₁ deficiency causes what? — Beriberi
993. Vitamin C deficiency causes what? — Scurvy
994. Vitamin D deficiency causes what? — Rickets
995. Iodine deficiency causes what? — Goiter
996. Iron deficiency causes what? — Anemia
997. Insulin deficiency causes what? — Diabetes
998. Calcium deficiency leads to what? — Weak bones
999. Why is blood red? — Due to hemoglobin
- 1,000. What is the largest gland in the human body? — Liver
